CoreGRID ... A business perspective

Grid is a key technology for Europe!

Building a pole position in Grid technologies

is an Unique Opportunity!

- ⇒ **Turn Grid research investment into tangible economic benefits**
- ⇒ **Make sure the research of today will answer the market needs of tomorrow**

CoreGRID = fantastic leverage tool

= >300 top-level researchers for 2M€/year

Why CETIC as IAB Chair?

IAB objectives

1. To communicate to the Network European Industry's long-term GRID-related technology needs and challenges,
2. To provide the Network with grid validation cases,
3. To help identify the market sectors to be addressed within the GRID User Community, in order to ensure a quick adoption of next generation GRID technologies within European industry,
4. To report to the Scientific Advisory Board its recommendation with respect to future strategic GRID-related research objectives.
