

## BIOGRAPHY

### Pierre Guisset, CoreGRID Spreading Excellence Leader

Pierre Guisset is currently the managing director of CETIC, the Belgian ICT research and technology transfer center.

He is strongly involved in multiple EU, national and regional research initiatives, and is in particular managing the spreading excellence activities and the links between Academia and Industry within CoreGRID.

Pierre is also strongly involved in the BEinGRID Integrated Project, with the objective of successfully transfer and deploy Grid technologies to the benefits of the European ICT Industry.

Pierre has a degree in civil engineering and in Business management, from the University of Louvain, Belgium.

After a first career as a researcher, in the fields of numerical methods in engineering and operation research, he created a start-up in the early 90ies, Numerical Integration Technologies, that was later on acquired by LMS International.

Pierre has been managing the world leading software product on numerical vibro-acoustics, and involved in very large engineering software projects and partnerships, with a focus on high performance computing.

Pierre has a strong experience in bringing technology to the market, and supporting the adoption process of new technologies by business, which is the reason why he joined CETIC five years ago.
